Professional Summary

Data Intelligence Engineer focused on developing data-driven solutions through data analytics, business intelligence, workflow automation, and intelligent applications. Experienced in Python-based data processing, SQL, operational reporting, data cleaning, KPI tracking, and interactive dashboard development. Interested in building scalable data pipelines and integrating machine learning and AI technologies to transform raw data into actionable business insights.

Technical Skills

Programming Data Analysis: Python, SQL, JavaScript, TypeScript(Learning), Pandas, NumPy.
Data Engineering: ETL, Data Cleaning, Data Transformation, Data Pipelines, DuckDB, Parquet, MySQL
Business Intelligence: Power BI, DAX, Power Query, Excel, Looker Studio, Plotly, Matplotlib
Automation: VBA, Office Scripts, Google Apps Script, Workflow Automation, Web Scraping, API Integration
Application Development: Streamlit, React(Learning), Node.js(Learning), Git, GitHub
AI & ML: Scikit-learn, Machine Learning, LLMs, Generative AI, Prompt Engineering Engineering.

Professional Experience

ACN Healthcare RCM Services Pvt. Ltd. Bengaluru, India
MIS Analyst *June 2025 – Present*

- Automated file segregation, report generation, and Outlook email distribution using Python, SQL, VBA, and Office Scripts, reducing repetitive manual reporting activities.
- Developed automated Excel reporting workflows to support daily production reporting, data validation, and operational KPI tracking.
- Used Pandas and NumPy for data processing, data cleaning, and analysis of operational datasets.
- Developed interactive reporting applications and dashboards using Power BI, Streamlit, and Plotly to improve data visibility and reporting efficiency.

Key Projects

AnyData Analyzer | *Python, Streamlit, Pandas, NumPy, DuckDB, Parquet* GitHub

- Developing a reusable data analysis platform to import and explore datasets across supported file formats.
- Implementing data cleaning, transformation, dynamic filtering, and interactive data exploration workflows.
- Using DuckDB and Parquet for analytical data processing and efficient data storage.
- Building interactive dashboards to help users explore datasets and generate actionable insights

RandomChat AI | *Python, JavaScript, TypeScript, React, Node.js, ML, LLMs* GitHub

- Developing a cloud-based random chat application focused on real-time user interactions.
- Designing the application architecture for scalable access and future AI-powered capabilities.
- Exploring machine learning and LLM integration to support intelligent conversational features.

Automated Web Scraping & Power BI Integration | *Python, MySQL, Power BI, ETL, Web Scraping* GitHub

- Developing automated web scraping workflows using Python to extract structured data from websites.
- Cleaning, transforming, and storing extracted datasets in MySQL using ETL processes.
- Integrating MySQL datasets with Power BI to build interactive dashboards and support data-driven insights.

Education

Bachelor of Science in Mathematics January 2021 – June 2024
Bundelkhand University, Jhansi, Uttar Pradesh

Data Analyst Training July 2024 – February 2025
Masai School

Certifications

Python (Basic) May 2025
HackerRank *Credentials*

Data Analytics Job Simulation April 2025
Forage *Credentials*

Career Essentials in Data Analysis December 2024
Microsoft & LinkedIn *Credentials*

SQL (Advanced) November 2024
HackerRank *Credentials*

Soft Skills

Problem Solving | Analytical Thinking | Teamwork | Adaptability | Time Management | Communication | Continuous Learning
